

February 1, 2016

The data contained in this report represent an extension of the Institute Normative Data report from the Course Instructor Opinion Survey (CIOS). This report contains data *BY SUBJECT* in the form of a 5-year running average from Spring 2010 through Spring 2015. The companion annual Normative Data report contains results *BY COLLEGE* from Fall 2014, Spring 2015, and since the inception of the CIOS.

The following data sets focus on survey Item 10: *Considering everything, the instructor was an effective teacher*. This question has been maintained in the same form throughout all versions of CIOS.

This format enables faculty to compare their scores with 5 year averages. Central tendencies and distributions of the question are reported by class size. Experience and general research confirm that class size is a primary variable explaining significant differences in ratings. The following notation may help you interpret the data:

- “N” is the number of classes in a particular population frame.
- “Median” is the middle value of an ordered array of classes’ interpolated median scores.
- Columns “Cut 1,” “Cut 2,” “Cut 3,” and “Cut 4” indicate the quintile values (20th, 40th, 60th, and 80th percentiles) in the distribution.
- Values range from 1 to 5, where 1 is “strongly disagree” and 5 is “strongly agree.”

We trust that these data are helpful to you. If you have any questions, feel free to contact Dr. Tris Utschig at 404.385.2949 or < [tris.utschig@gatech.edu](mailto:tris.utschig@gatech.edu) >.

Tristan T. Utschig, PhD  
Assistant Director, Office of Assessment
